Experience

Project Lead and Developer at Up-time Mar 2017- Present

www.jonnygwillim.co.uk

Up-time is a platform that aims to boost the wellbeing of patients going through dialysis treatment. I have designed, built, tested, user tested and creatively directed Up-time. Up-time was prototyped in JQuery and I am now choosing between React and Angular for version 1.

Front end developer at Hacksy Jun 2016 - Sep 2016

www.meethacksy.com

Hacksy is an online learning tool built by Decoded, the technology educator. My role was to come up with and develop front end technical solutions for Hacksy, a multiple state web application, from its minimum viable product to a minimum saleable product. I helped to get Hacksy to the top of the Product Hunt weekly chart.

Apps from Scratch Mar 2016 - Present

www.github.com/03difoha/AppsFromScratch

Apps from Scratch is a six week weekend course that teaches individuals how to code. It is a part of the Greenwich Digital Skills scheme that aims to increase employment in the Greenwich Borough. I co-created and co-delivered this open source course every Saturday at Ravensbourne University.

Education

Web Production (BA Hons) 1st Sep 2014 - Jun 2017

Ravensbourne, London

Foundation in Art and Design (Fda) DMM Sep 2013 - June 2014

Somerset College, Taunton
